

Every factory-made item of clothing has a little white care label. Normally it's sewn into a seam at the side of the garment or at the back of the collar or waistband. Before they are sold, samples of the fabrics are tested to see how well they stand up to washing, ironing and tumble drying. Then care symbols are used to advise us how to treat them.

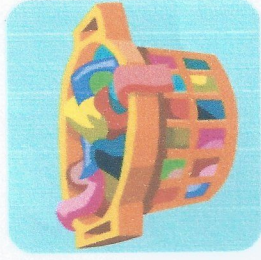

Use this chart to put down the care symbols from some of your clothes.

Washing	Bleaching	Dry cleaning	Drying	Ironing
 = can wash	 = can bleach	 = can dry clean	 = can tumble dry	 = can iron
 = wash by hand	 = do not bleach	 = do not dry clean	 = do not tumble dry	 = iron at a medium heat
 = wash at 40 degrees C				 = do not iron
